

SS 2 HOME MANAGEMENT WEEKS 1-6

WEEK: ONE

TOPIC: TIME MANAGEMENT

STEP 1: MEANING OF TIME MANAGEMENT

WHAT IS TIME MANAGEMENT:

Time management is the process of planning and exercising conscious control of time spent on specific activities, especially to increase effectiveness.

It is the application of the learning process of time (planning, organizing, implementing and evaluating) in order to accomplish or perform certain tasks or duties.

Time is often used with other resources such as energy, to reach a goal.

STEP 2: ADVANTAGES OF TIME MANAGEMENT

- 1.) It helps in effective utilization of resources
- 2.) It prevents procrastination. This also reduces indecision or worry
3. Time management minimizes waste of time and leads to accomplishment of greater work.
4. It helps individuals/families to prioritize and increase productivity.
5. Time management helps to establish routines for household tasks.
6. It saves energy, hence reducing fatigue

STEP 3: PATTERNS OF TIME USE

Patterns of time use can be grouped into 2, according to specific application:

- 1) Work time
- 2) Non-work time

1) Work Time: It is time spent on activities which produces quantifiable/measurable results.

There are several types of work time and they include:

- i.) Employment Time: This is the time spent on work for pay

ii.) Home – related Work Time: This is the time spent on household care, personal care and care for other family members. e.g. Preparing food, after-meal clean up etc

iii.) Volunteer Work Time: This is the time spent on voluntary work such as church, community etc for no monetary pay.

2.) Non-Work Time:

These include:

i.) Sleep time: This consumes about $\frac{1}{3}$ of an adult's day and majority of a child's day.

ii.) Free Time: This is the time not devoted to work or to sleep. Free time can be caused by unemployment chosen by the individual for their own reward. It is often used for things not allocated for other activities.

iii.) Leisure Time: This is the time spent on activities chosen by the individual for their own reward. It is often used for relaxation e.g. time spent on family picnics.

STEP 4: APPLICATION OF MANAGEMENT PROCESS TO TIME USE

The following should be considered in managing time use;

1. Planning Time Use:

This is the process of planning what to do at a particular time. Time plan enables individuals/families to make an overview of the entire day and activities which leads to balancing of daily living. A time plan also acts a reminder for activities that needs to be carried out.

Steps in making Time plan

- a.) List all the activities to be done in a day, including the priorities (those that must be done) and non-priorities (may not be accomplished).
- b.) Estimate the amount of time that will be used to accomplish each task.
- c.) Compare the total estimated time for all the tasks listed with the time not allocated to any task.
- d.) Determine the exact time when each task will be accomplished.

Example of Time Plan

S/N	Time	Tasks
1	5:00 – 5:45 am	Morning devotion
2	5:45 – 6:00am	Cleaning of the compound
3	6:00 – 6:15am	Bathing
4	6:15 – 6:40am	Preparing and eating of breakfast
5	6:40 – 7:00am	Tidying of breakfast dishes
6	7:00 – 7:20am	Preparing/leaving for work

2. Organizing the activities in Time plan:

This involves an orderly arrangement of the planned events. Here, the home manager assigns duties to other people who are involved in the activities.

3. Implementing Activities of the time plan:

At this stage, the home manager checks to ensure that activities are being carried out at the stipulated or planned period. Adjustment can be made at this stage in cases of unforeseen circumstances like accidents, the time plan can be altered to avoid delays and interruptions.

4. Evaluating Time plan:

This process involves checking the extent to which the activities in the plan have been accomplished. Here, the home manager checks how the task was accomplished, how successful the time plan was, and the problems encountered during the process.

This process helps the home maker asks questions and make necessary adjustment for future time plans.

ASSIGNMENT:

1. Create a time plan for your daily activities.

Note that: while creating your time plan, allocate time for your free or leisure time

EVALUATION (STUDENTS):

- i. Explain the meaning of time management
- ii. Enumerate the advantages of time management
- iii. Describe the patterns of time use
- iv. Discuss the application of management process to time use

SUMMARY:

Time is one of the resources available to individuals and families (human resources). Every family, individual, organization has the same amount of time (i.e. 24 hours). Proper management of this time affects person's goal attainment, hence time management is necessary.

There are different patterns of time use which includes; the work time and the non-work time. Time management can also be applied in the management process of the home which includes planning, organizing, implementing and evaluating the time plan.

WEEK: TWO

TOPIC: ENERGY MANAGEMENT

STEP 1: MEANING OF ENERGY MANAGEMENT

Energy management is the process of planning and controlling the use of energy in order to preserve or conserve it.

Proper energy management reduces fatigue and leads to accomplishment of more tasks.

STEP 2: ADVANTAGES OF ENERGY MANAGEMENT

1. It eliminates fatigue.
2. Energy management minimizes the amount of time spent on a given task.
3. It encourages work to be carried out in the best way, and hence eliminates unnecessary movement.
4. It aids in energy conservation.
5. It helps to increase the worker's interest in a given task; hence, it reduces boredom.

STEP 3: MEANING OF FATIGUE AND TYPES OF FATIGUE

Fatigue is the reduction in energy which comes as a result of physical or mental work, or weakness as a result of hard labour.

In clear terms, fatigue means tiredness. Fatigue usually results in reduced performance of work.

Types of Fatigue

Fatigue is divided into two categories, namely:

1. Physical or physiological fatigue
2. Mental or psychological fatigue

Physical / Physiological Fatigue:

Physical fatigue results when an individual is unable to do work, maybe as a result of previous work done or too much labour. Here, the individual becomes physically tired.

The remedy to physical fatigue is rest and sleep. This enables the person to regain lost strength.

Mental / Psychological Fatigue

Mental fatigue comes as a result of a person's dislike or resentment for a particular job or task. This resentment prevents the work from being done, though the physical energy might be available.

Psychological/mental fatigue is divided into two:

- a. **Boredom:** This is characterized by restlessness, yawning and the desire to stop the task being carried out, though the capacity/energy to do work is still available or has not changed.
- b. **Frustration:** This may come from the job or some other interruptions (like confusion). Many times, frustration can result from some personal problems, such as family; this reduces or slows down the tasks and hence increases the amount of time spent on a job or task.

STEP 4: GUIDELINES FOR ENERGY MANAGEMENT

1. Avoid doing many tasks all at the same time.
2. Proper planning of task or work.
3. Alternate tasks that require much energy with those that require less energy.
4. Break big tasks into smaller tasks and do them in bits.
5. Use the best method and correct tools for every task.
6. Use the best posture for a given task or work.

STEP 5: FACTORS AFFECTING THE USE ENERGY IN HOUSEHOLD WORK

1. The skills and experience of the individual: A person who possesses the skills and experience needed for a task will normally spend less time and energy on it
2. Tools used for work: Different types of tasks require different types of tools. The use of suitable tools can increase the pace of work and reduce time and energy required.

3. Posture of the worker: There is a correct posture for a given task. The wrong posture can result in bodily discomfort and expenditure of more energy for the task.
4. Health of the person: A healthy person will have more energy to spend on work than a sick person.

ASSIGNMENT:

1. Enumerate 5 ways of preventing/handling fatigue in energy management

EVALUATION (STUDENTS)

- i. Define energy management
- ii. Enumerate the advantages of energy management
- iii. Explain the meaning and types of fatigue
- iv. Mention ways of preventing fatigue
- v. Describe the factors affecting the use of energy in household work

SUMMARY

Energy management is the process of tracking, planning and optimizing energy consumption to conserve usage of energy.

The following guidelines should be followed for effective energy management;

1. Alternate heavy and light jobs: For instance, home gardening can be energy sapping. You can alternate it with such a light job as washing the dishes.
2. Use the correct tools: Correct tools make work easier and reduce the amount of energy required. For instance, cutting vegetables with a sharp knife is easier than cutting with a blunt knife.
3. Use best methods for doing any given job: For instance, cutting vegetables on a chopping board down along the force of gravity is easier than holding them in your left hand and cutting with the right hand against the force of gravity.
4. Always use the correct working posture for any job.

WEEK: THREE

TOPIC: WORK SIMPLIFICATION

STEP 1: MEANING OF WORK SIMPLIFICATION

Work Simplification is the process of reducing the amount of time and energy required to accomplish a given piece of work; or to accomplish more work with a given amount of time and energy.

Work simplification describes the making of daily tasks easier in order to reduce strain or to decrease the amount of energy required to complete an activity.

The aim of work simplification is to accomplish more work with limited amount of time and energy.

STEP 2: ADVANTAGES OF WORK SIMPLIFICATION

1. It reduces the amount of time required for a given job.
2. It reduces frustration, boredom or fatigue resulting from monotony.
3. It affords the home maker free time for rest and leisure
4. It enables the home maker to cut down the number of motions or movement while performing specific tasks.

STEP 3: GUIDELINES FOR WORK SIMPLIFICATION

Work simplification principles relate ***to the work, the worker, the work environment and the equipment***. The following are guidelines for work simplification:

1. Posture usually affects the use of energy in any work or task. Therefore, it is important to use good standing, sitting and working postures.
2. Use both hands to work and divide the movement between equally, e.g. putting away dishes with two hands.
3. Jobs done sitting down should alternate jobs done while standing.

4. Tasks that require the same equipment can be combined, so as to accomplish more tasks at a time; e.g. making stew and soup on a two-burner cooker.
5. Place items so that they can be easy to see, reach, grasp and replace. This reduces stress.
6. Use labour saving devices or equipment; e.g. of labour-saving devices include Vacuum cleaners, blenders, washing machines etc.
7. The worker must have some rest periods during the day in order to eliminate physical fatigue.
8. Raw materials that save time can be used in accomplishing a task. Example the use of yam or cassava flour instead of pounding them using mortar.

STEP 4: APPLICATION OF WORK SIMPLIFICATION TO SPECIFIC HOUSEHOLD TASKS

APPLICATION OF WORK SIMPLIFICATION TO LAUNDRY WORK

Here is an illustration of a work simplification process in laundering of clothing.

1. Choose fabrics that are easy to wash and require little or no time ironing, in order to reduce laundry work.
2. Carry out laundry works on less busy days, preferably on weekends.
3. Assemble all that is required for the work before washing; e.g. washing basins, laundry agents etc.
4. Use washing machine if available.
5. Use the correct method for washing some specific fabrics.
6. Ironing board should be of a comfortable height for the worker.

APPLICATION OF WORK SIMPLIFICATION TO MEAL PREPARATION

1. Kitchen Layout: This has to do with proper kitchen arrangement. The kitchen is the work place for meal preparation, so it should be arranged in such a way that prevents excessive movement, so that work can be carried out in a sequence. For instance, the food is taken out of storage, washed, prepared, cooked and served. Arrangement of equipment to suit this sequence can conserve time and energy for the homemaker.

There are four basic kitchen layouts: the one-wall or corridor type, the parallel, the L-shaped. Any of the four can be adopted, depending on the design and size of the kitchen.

2. Purchase non-perishable foods in bulk and store them properly.
3. Make preliminary preparations, e.g. grind large quantities of tomatoes and pepper, boil and store them in the refrigerator for use when required. Process beans into flour and store for use in making moi-moi or akara balls.
4. Assemble all ingredients and utensils before starting to cook.
5. Follow the correct method of preparing each dish.
6. Make use of appropriate utensils for preparing food. While the food is cooking, wash the utensils and set the table, this saves the time and energy of the homemaker.
7. After meals, clear the table, wash used dishes and put them in a basket or on a draining board to drain.
8. Store utensils and supplies (food stuffs) close enough at the place where they will be used.

ASSIGNMENT:

1. Describe the application of work simplification to the following;
 - i. Sewing of clothes
 - ii. Entertainment

EVALUATION (STUDENTS):

- i. Explain the meaning of work simplification
- ii. Enumerate the advantages of work simplification
- iii. Mention the guidelines for work simplification
- iv. Describe the application of work simplification principles to specific household tasks (e.g. laundry work, meal preparation)

SUMMARY:

Work simplification is the process of reducing the amount of time and energy required to accomplish a given piece of work. it reduces the amount of time required for a given job and reduce frustration, boredom or fatigue from the monotony of long and routine habits of housework.

Work simplification principles and techniques can be applied to different tasks in the home such as laundry, meal preparation etc.

WEEK: FOUR

TOPIC: HUMAN RIGHTS

STEP 1: DEFINITION OF RIGHTS

A right can be seen as:

1. A natural due
2. A moral claim
3. A legal entitlement

Generally, *rights can be defined as freedoms and benefits guaranteed to people by the law.*

STEP 2: FUNDAMENTAL HUMAN RIGHT OF NIGERIANS

Fundamental rights of every Nigerian can be said to be all the legal entitlements of everyone (every Nigerian).

These fundamental rights are written in the Constitution of the Federal Republic of Nigeria, Chapter IV, Sections 33–43, Page 18–26.

Some of these fundamental rights include:

1. **Right to life** ÷ This right entails that no one should be deprived of his/her life intentionally.
2. **Right to fair hearing:** Every person is entitled to a fair hearing either by the court of law or other law agencies without partiality.
3. **Right to dignity of a person:** No person should be subjected to any form of ill-treatment.
4. **Right to freedom of thought and religion:** Everyone is free to have a religion of his/her own, excluding secret cult group.
5. **Right to freedom of movement:** Every citizen is entitled to move freely within any part of Nigeria.
6. **Right to private and family life:** The homes of every citizen is guaranteed and protected.
7. **Right to freedom of expression and the press:** Every Nigerian citizen is free to express his/herself.
8. **Right to freedom from discrimination:** No Nigerian citizen is expected to discriminate sex, religion, or political opinion of others.
9. **Right to acquire and own immovable property anywhere in Nigeria.**

10. Right to peaceful assembly and association: Every person shall be entitled to assembly freely and associate with other persons.

Other rights include (included by Citizen's Forum for Constitution Reform (CFCR)):

- i) Right to education
- ii) Right to health
- iii) Right to clean and healthy environment
- iv) Right of the child, etc.

STEP 3: RIGHTS OF A CHILD

In Nigeria, a child is anybody who is below 18 years. The rights of a child was adopted by the UN general assembly on the 20th of November 1989, and Nigeria was one of the countries that adopted this right.

The rights of a child are summarized below:

1. A child has the right to life.
2. A child has the right to survive.
3. A child has the right to develop.
4. A child has the right to participate actively in the promotion of his/her rights.

Basic Principles of Child's Rights

1. Every child has the right to life, survive and develop as well.
2. Every child is entitled to a name, family and nationality.
3. Every child has the right to express opinions and freely communicate them.
4. Every child is entitled to protection from any act that interferes with his or her privacy, honour and reputation.
5. Every child is entitled to adequate rest, recreation (leisure and play) according to his/her age and culture.
6. Every child either male or female is entitled to receive compulsory basic education and equal opportunity for higher education depending on individual's ability.

7. Every child is entitled to good health, protection from illness and proper medical attention for survival, personal growth and development.
8. Every child must be protected from indecent and inhuman treatment through sexual exploitation, drug abuse, child labour, torture, maltreatment and neglect.

STEP 4: RIGHTS OF WOMEN

Women and men are entitled to all the fundamental human rights; but in some countries women and girls are discriminated. This led the United Nations (UN), which Nigeria is a member, to adopt ***a Convention on the Elimination of All Forms of Discrimination Against Women (CEDAW)*** on December 1979. This convention became a force on September 3rd 1980.

Rights of Women as Stated by CEDAW

Some of the rights include the following:

1. The right to work, which is an inalienable right of all human beings.
2. The right to the same employment opportunities as men.
3. The right to free choice of profession and employment.
4. The right to protection of health and to safety in working conditions.
5. The right to participate in recreational activities, sports and all aspects of cultural life.
6. Right to obtain all types of training and education, whether formal or non-formal.
7. Right to family benefits.

STEP 5: VIOLATION OF RIGHTS

The following are ways in which human rights can be violated:

1. When a person is denied of his/her right.
2. When a person is abused. A child or an adult can be abused in different ways, such as physical attack, women trafficking, etc.
3. When a person does not know his/her right and cannot enjoy it.
4. When a person is prevented from enjoying the rights.

ASSIGNMENT:

1. Explain 5 ways of acquiring citizenship

EVALUATION (STUDENTS):

- i. Define rights
- ii. State the fundamental human rights of every person in Nigeria
- iii. Identify the basic principles of child's right
- iv. Enumerate the rights of women
- v. Mention ways the rights of a person can be violated

SUMMARY:

A citizen is a legal member of a state, with full Constitutional and legal right in the country in which he/she belongs. Rights are freedom guaranteed to people by the law. The fundamental rights of every Nigerian person includes the following: right to life, right to freedom of movement, right to freedom of movement, right to dignity of a person, right to fair hearing etc. Other rights include the rights of women and the rights of a child.

WEEK: FIVE

TOPIC: SEXUALLY TRANSMITTED DISEASES

STEP 1: MEANING OF SEXUALLY TRANSMITTED DISEASES

This is also called sexually transmitted infection. They are illnesses that is spread from one person to another through sexual contact mostly through unprotected sex.

Signs of sexually transmitted diseases

- i. Heavier than normal vaginal discharge
- ii. Itching in genital or anal areas
- iii. Discharge from penis or anus
- iv. Sores or rashes in the genital or anal area and sometimes redness
- v. Painful or more frequent urination
- vi. Pelvic pain that is not related to the monthly period
- vii. Fever, headache and feeling of illness.

STEP 2: TYPES OF SEXUALLY TRANSMITTED DISEASES

The most common types of sexually transmitted diseases include the following:

1. **SYPHILIS:** This is a bacterial infection caused by a bacteria called *Treponema palladium*.

It can be spread through sexual contact with an infected person.

Symptoms of syphilis

- i. Sores on the sex organs
- ii. Fever, aches, rashes and hair loss
- iii. It can affect the heart, eyes and brain

Syphilis can be treated using **antibiotics**.

2. **GONORRHEA:** This is also a bacterial infection caused by the bacteria *Neisseria gonorrhea*. Its main mode of transmission through sexual contact. Gonorrhea can cause infertility in both male and females.

Symptoms of gonorrhea

- i. Itching and discharge from penis and vagina
- ii. Painful urination

Gonorrhea can also be treated with **antibiotics**

3. HERPES:

Herpes is another STD that is caused by a virus called ***Herpes Simplex Virus***. It affects the skin and produces small, painful, fluid-filled blisters usually around the mouth or genital area. There are two types of herpes namely:

- i. HSV-1 (oral, from kissing, casual contact)
- ii. HSV-2 (genital herpes from sexual contact)

Symptoms of herpes

- i. Small, painful blisters filled with fluid
- ii. Blisters burst and form sores
- iii. Itching or tingling sensation before blisters appear
- iv. Swollen glands and general body pains
- v. Painful urination if the genitals are affected.

4. HIV/AIDS: This one of the life-threatening STDs because it can cause death of the infected person. ***Acquired immune deficiency syndrome (AIDS)*** is caused by a virus called ***human immuno-deficiency virus (HIV)***. The virus enters the body of a person and kills the cells of the immune system, causing the body to be weak and unable to fight illnesses. The **HIV** causes the infected person to come down with **AIDS**

Symptoms of HIV/AIDS

- i. Loss of weight
- ii. Fever, rashes, diarrhea and other sicknesses
- iii. Cough(tuberculosis)

STEP 3: WAYS OF CONTRACTING HIV/AIDS

1. Through sex with an infected person
2. From transfusion of infected blood
3. Sharing blades with an infected person
4. Sharing needles, syringes, or other injection equipment.
5. Accidental needle-stick injuries in healthcare settings.
6. Women with HIV can pass it to their babies. They can be infected;
 - a. While in the mother's womb
 - b. Through breastfeeding

STEP 4: WAYS OF PREVENTING HIV/AIDS

1. Abstinence from sexual activity until marriage, when married stay faithful to your partner
2. Women with HIV should seek advice before getting pregnant
3. Avoid blood transfusion as much as possible, in cases when transfusion is unavoidable, insist on having the blood tested.
4. Do not share razor blades
5. Cover cuts and wounds with plasters
6. Make sure all blades, needles, and syringes are sterilized before using them

ASSIGNMENT:

1. Explain self-medication
2. Enumerate five (5) consequences of self-medication

EVALUATION (STUDENTS):

- i. explain sexually transmitted diseases
- ii. Describe the types of sexually transmitted diseases
- iii. Identify the ways of contracting HIV/AIDS

iv. Enumerate ways of preventing HIV/AIDS

SUMMARY:

Sexually transmitted diseases are diseases that are spread through sexual contact. There are different types of sexually transmitted diseases which include syphilis, gonorrhea, herpes and HIV/AIDS. The deadliest among these STDs is the HIV/AIDS because it causes death.

HIV/AIDS can be spread through sexual intercourse, sharing of needles and other sharp objects, transfusion of blood and also from mother to child.

The best way to prevent STD is to abstinence.

WEEK: SIX

TOPIC: COURTSHIP AND MARRIAGE

STEP 1: HEALTHY BOY-GIRL RELATIONSHIP

During adolescence period, boys and girls usually relate with each other. It is usually natural to have friends with both sexes. But it is important to make the relationship healthy.

Guidelines for Healthy Boy-Girl Relationship

1. Effective communication channel should be established between Parents and their adolescent children. This helps the parents to know the types of friends their wards have and give necessary advice.
2. Adolescents should choose friends who have good character. They should seek their parent's approval of their friends. They can also invite their friends home to introduce them to their parents.
3. Adolescents should feel free to discuss their problems with their Parents.
4. They should choose friends for what they really are and not for what they possess.

STEP 2: MEANING OF COURTSHIP

Courtship refers to a stage during which a couple develops or young people develop a relationship before marriage. It is a period when young people who are intending to get married move about and get to know each other. They study each other's behaviour, moods, likes and dislikes, they also learn about each other's family background. Courtship often differs with cultures and even families.

STEP 3: FACTORS TO CONSIDER WHEN CHOOSING A LIFE PARTNER

1. Love: Love should be the basis for marriage. Every individual should choose a partner whom they love.
2. Personality Patterns: A person should choose a partner they are physically attracted to.
3. Personality: A person should choose a partner whom their personalities complement each other rather than those which resembles or replicate theirs.

4. Compatibility: Intending partners should share similar interest, likes or dislikes, they should share compatibilities in also other aspects of life.
5. Physical attraction: For a successful marriage partners should be physically attracted to each other.
6. Economic/financial security: Before marriage the partners should ensure that they are economically ready. It is important that the man should be gainfully employed.
7. Parental Consent: According to Nigerian culture, it demands that individuals must seek and obtain the approval of their parents before marriage.
8. It is important that intending partners should carry out genotype examination before marriage.

The following genotypes exist:

Consider the following,

- a) AA + AA — Good
- b) AA + AS — Good
- c) AS + AS — Not Good
- d) AS + SS — Not Good
- e) SS + SS — Not Good

NOTE THAT:

AA — Non carriers of sickle-cell

AS — Harmless carriers of sickle cell

SS — Carriers of sickle cell

STEP 5: MEANING OF MARRIAGE

Marriage is the voluntary union for life of a man and a woman as husband and wife.

It is also defined as a formal union and social and legal contract between two individuals that unites their lives legally, economically and emotionally.

It is an institution established by God for the purpose of unifying a man and woman as husband and wife for the purpose of procreation, companionship and assistance to each other.

STEP 6: TYPES OF MARRIAGE

1. Traditional or Customary marriage:

This is a marriage entered into according to the native laws and customs. It varies from one area to another in Nigeria. Each ethnic group has their specific marriage customs and procedures. In some areas the husband is usually expected to pay a specific amount of money as bride price.

2. Marriage Under the ordinance:

This is also called Court marriage because it is contracted in the court before a court registrar. It is a marriage patterned after the British marriage laws.

CHARACTERISTICS OF MARRIAGE UNDER ORDINANCE

- i. It does not allow either of the couple (husband or wife) to enter into a second marriage; unless at the death or official divorce of one.
- ii. It is a monogamous form of marriage.
- iii. A marriage Ordinance certificate is given to the couple who marries this way.
- iv. It is provided by government and open to all religious sects or tribes.

3. Church Marriage:

This is also a form of marriage under Ordinance which is contracted in the church. It is also a monogamous form of marriage. Marriage certificates are usually given to couples and such certificates are recognised by the court of law.

Christian marriage is usually performed by christians. It is carried out by the church officiating ministers.

4. Moslem or Islamic Marriage:

Moslem or Islamic marriage is contracted according to the ways of Islam. Moslem men are allowed to marry up to four wives, which is a Polygamous form of marriage.

ASSIGNMENT:

1. What is online friendship
2. Mention 2 advantages and 2 disadvantages of online friendship

EVALUATION (STUDENTS):

- i. Enumerate the guidelines for a healthy boy/girl relationship
- ii. Explain the meaning of courtship
- iii. State the factors to consider when choosing a life partner
- iv. Explain the term “marriage”
- v. Describe the types of marriage

SUMMARY:

Courtship is a period when young people who intend to get married, move around and get to know each other better. They study each other's likes and dislikes, behaviours, moods etc.

Before marriage intending couple should consider some factors which include: love, physical attraction, personality, compatibility, financial stability etc.

Marriage is a formal, socially approved and legal union between a man and a woman. The major types of marriage include; customary or traditional marriage, marriage under ordinance, Islamic marriage and church marriage.
